## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-2, 4-11, 15-22 and 24-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art does not teach the deflection device has a common planar reflection surface configured to receive radiation transmitted by each of the transmitter modules and reflected from the monitored zone with the radiation transmitted by each of the transmitter modules and reflected from the monitored zone with the radiation transmitted by the transmitter modules and the radiation reflected from the monitored zone being incident on the reflection surface at regions spatially separate from one another. Prior art does not teach. Prior art does not teach the receiver device is divided to a plurality of receiver regions which can be evaluated separately from one another which each include one or more photodiodes, with at least one receiver region being associated with each transmitter module. Prior art does not teach the axis of rotation of the deflection device extends centrally through the receiver device and the transmitter modules are arranged equally far away from the axis of rotation. Prior art does not teach transmitting elongated radiation front in the direction of travel of the vehicle and adjusting the transmitter modules such that the elongated radiation fronts extend in a vertical direction such that an elongated vertical over radiation front is formed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
